

Leonardo Logistics

Leonardo Logistics Company Profile

ABOUT US

Leonardo Logistics is a Leonardo subsidiary.

We specialise in inbound and outbound industrial logistics, design and engineering for logistics, transportation, shipping, customised packaging and materials service providers.

We manage integrated logistics with criteria of efficiency, innovation and continuous improvement, adopting customized technological solutions.

MISSION & VISION

We support companies that see logistics as an indispensable process for their industrial success and we see our people as the main driver of development and competitiveness.

MISSION

The mission of Leonardo Logistics is to support companies through sustainable logistics based on operational excellence and the value of its people. We work alongside our costumers, who see logistics as an indispensable and functional process for their industrial and commercial success.

VISION

Leonardo Logistics aims to consolidate and strengthen its leadership role through the development of sustainable logistics based on operational excellence and on the value of our people, with constant customer focus.

OUR COMPANY

A widespread presence

Leonardo Logistics boasts a capillary presence throughout the national territory which grants its Customers immediate flexibility and response to the operational requirement, by offering synergies, organization, efficiency and competitiveness.

Our people: integrated logistics is all about skills and know-how

The knowledge, skills and know-how of the people who work for us are the true asset of a service company like our own, generating economic, personal and social value.

We at Leonardo Logistics believe it is important to reward merit in the performance of outstanding activities, acceptance of responsibility and leadership. We encourage career growth with ongoing training and professional development allowing employees to advance their knowledge and improve their performance while getting more satisfaction out of their work.

Guided by our rules, inspired by our values

Ethics and integrity form the basis of our *modus operandi*. It is our principles that govern our relations with customers, suppliers, industrial and commercial partners and with all our stakeholders. Our solid values successfully support all our activities and the work we do. Leonardo Logistics holds all the relevant institutional qualifications as established by the law. (ISO9001, EN 9120, ISO 14001, BS OHSAS 18001, AEO FULL, IATA)

~ €100M revenues

~ 70 work sites

~ 1.000 employees + 500 external resources

~ 300.000 square metres of warehouse space

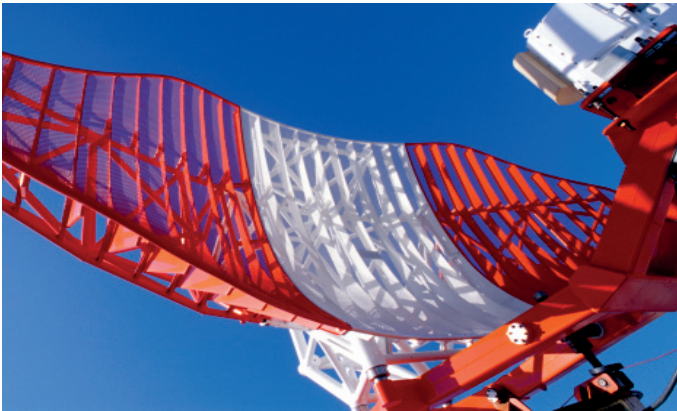

~ 72.000 shipments handled

PRIMARY SECTORS

AEROSPACE

MILITARY SECTOR

OUR SERVICES FOR INTEGRATED LOGISTICS

Logistics

- › We support our costumers to manage the **inbound and outbound logistics process** of their plants, from receipts of goods to shipment of finished products, including key processes such as quality control, kit preparation and production line feeding, packaging optimization.
- › Our dedicated team of engineers designs and creates integrated logistics systems based on criteria of efficiency, innovation and sustainability, adopting customised technological solutions.

Transportation

- › We coordinate, streamline and monitor the material shipping requests using a centralised Control Tower that provides digitized management of the flows and the transport processes through a specific Transportation Management Systems platform and with the cooperation of qualified and competitive shipping agents.
- › We also offer services for the transport and management of **military and classified goods**.

Service Provider

- › The service we provide includes end-to-end management of **draw metal and production auxiliary materials**, from supply to delivery directly at the locations where they are used by the costumers at their production sites, according to the specific requirements they have expressed.
- › The major **benefits in terms of efficiency and effectiveness** regard the supply chain management, minimisation of scraps and obsolescence of the materials, reduced customer warehouses and optimisation of the materials.

DEFENSE SUPPORT

- > We have always been specialised in providing logistics support to the defence industry.
- > In collaboration with the Divisions, Leonardo Logistics plays an active role in integrated logistics for the management of spare parts for the weapon systems used by the Italian armed forces, adopting an Integrated Logistic Support (ILS) process for designing and building systems conceived rationally in terms of cost to performance ratio. It performs engineering analyses on these systems with the aim of minimising intrinsic operational risk.

INNOVATION AND DIGITAL TRANSFORMATION

Leonardo Logistics, in partnership with Leonardo's CTIO, promoted the **“Advanced Logistics 4.0”** programme for **digital transformation and innovation in logistics services** through design and development of advanced platforms and technologies and re-engineering of processes and know-how.

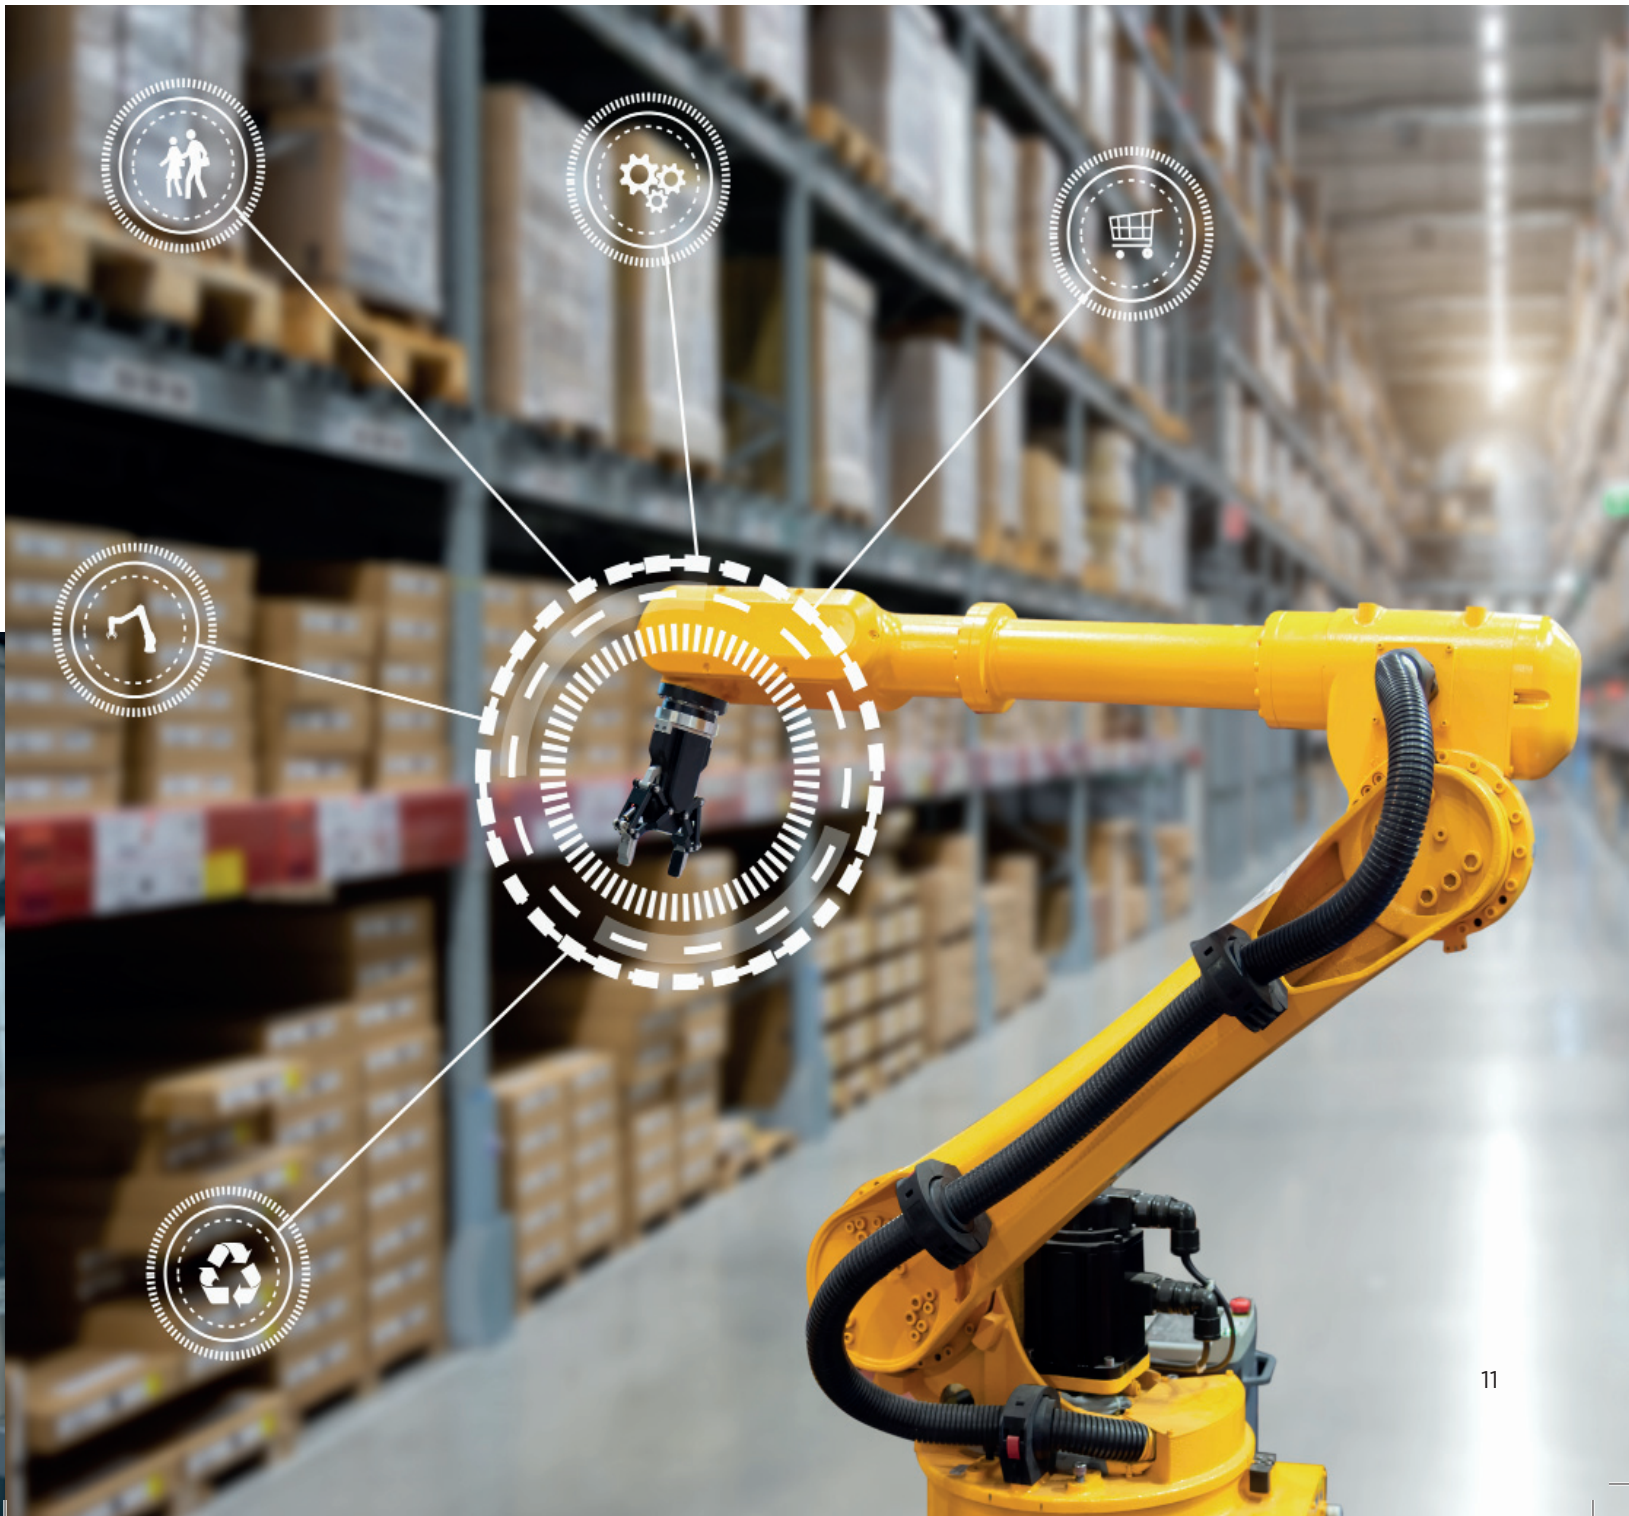

This forward-looking approach explores technology, researching and offering innovative, effective solutions responding to customers' needs.

We design and develop **Warehouse and Transportation Management Systems** specialising in advanced management of the logistical processes constituting the base for integration of innovative technologies, with the goal of offering “turnkey” solutions supporting logistics services.

We support the process of innovation in our areas of competence, promoting adoption of advanced digital technologies:

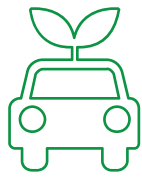

- › **Unmanned Technologies and Robotics** (Smart Sensors, RFID, Automated Guided Vehicles, IoT, Collaborative Robots) with **Artificial Intelligence**
- › **Digital Twins, Big Data and Quantum Computing** using advanced simulation scenarios
- › adoption of Leonardo's advanced solutions for **High Performance Computing / Cloud Computing**

OUR PROPOSAL FOR SUSTAINABLE LOGISTICS

We work consistently with Leonardo's integrated approach as regards sustainability, promoting actions to monitor and streamline our services and create long-term value

Optimising transportation of materials:

Transportation Control Tower for coordination of requests for shipment, directing them towards greener methods of transportation
la gestione paperless

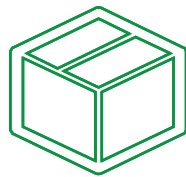

Digital warehouses:

software platforms, integrated technologies and sustainable infrastructure and machinery facilitating automation of the entire operating process and paperless management

Green processes and resources:

ecological handling equipment (such as electric carts with lithium batteries) to save energy and cut emissions

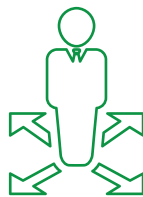

Packaging management:

designed on the basis of criteria of sustainability, using recycled materials, and managed with a view to minimising waste and facilitating reuse

Partnerships:

suppliers and contracts selected on the basis of criteria of innovation and sustainability, with whom to work toward long-term goals and plans for development

Resources and talents:

allowing people to make the most of their abilities and advance their knowledge through management models based on the values which with Leonardo is identified, and on diversity and inclusion
